Profile

Data and ICT professional with experience in database administration, pipeline engineering, and information management across public and private sector environments. Proven track record of ensuring the **confidentiality, integrity, and availability** of organizational data assets, optimizing database performance, and enforcing governance standards in support of digital transformation initiatives.

Experience

Business Intelligence Analyst Sept 2025 – Present

SM Jaleel & Co. Ltd. *Trinidad and Tobago*

- Designed and maintained **dimensional data models** and database structures supporting performance tracking across **4 business units**, ensuring data integrity, consistency, and availability for enterprise reporting
- Unified data pipelines across **5+ disparate sources**, enforcing data quality and governance controls that reduced preparation time by an estimated **30%** and improved reporting reliability
- Collaborated with stakeholders across Sales, Finance, and Operations to translate business requirements into database-driven reporting and forecasting models aligned with organisational best practices

Project Support Officer Oct 2023 – Nov 2024

Ministry of Digital Transformation of Trinidad and Tobago *Trinidad and Tobago*

- Curated and published **20+ government datasets** on the national Open Data platform, applying data validation, quality assurance, and **compliance with open data standards and government policies**
- Maintained PMO project databases and reporting systems, ensuring **data definitions, access controls, and reporting standards** aligned with government ICT procedures and best practices
- Trained and guided **10+ stakeholders** in the adoption of Smartsheet, migrating Excel-based workflows to structured digital systems and improving data discipline across active ICT projects

Software Developer Intern Aug 2023 – Oct 2023

SuperPharm Ltd. *Trinidad and Tobago*

- Administered **SQL Server databases** for a **30+ location retail chain**, maintaining the **confidentiality, integrity, and availability** of critical business data across distributed operations
- Optimized **SSIS pipelines and database queries**, achieving a **20% improvement in query performance** and **15% reduction in response times**, strengthening operational reporting continuity
- Developed and maintained database documentation and procedures, enabling repeatable, auditable database administration aligned with established standards

Projects

TranquilTT | *HTML, CSS, JavaScript, Node.js* | GitHub | Live Demo

- Mental wellness platform providing curated support resources across T&T; awarded **1st place at DIA Tech 4 TT Hackathon 2024**

Car Dealership Review Platform | *Python, Django, SQLite*

- Designed and developed a full-stack system with a structured relational database enabling persistent storage, filtering, and secure retrieval of records

Education

University of Waterloo Sept 2019 – Apr 2023

Bachelor of Mathematics and Business Administration (Honours), Computing Minor *Ontario, Canada*

Technical Skills

Database: SQL Server, SQLite, T-SQL, SSIS, Database Design & Modelling, Query Optimisation, Performance Tuning, Data Integrity Controls
Languages: Python, SQL, R, JavaScript, HTML/CSS
Tools: Power BI, Excel, Smartsheet, RStudio
Practices: Data Governance, CIA Triad Principles, Database Administration, KPI Design, Data Quality & Validation, Documentation & Procedures
